PROFILE SUMMARY

Motivated and detail-oriented Master of Computer Applications (**MCA**) graduate (**2026**) with a strong foundation in software development, programming, database management, and problem-solving. Passionate about building innovative, scalable, and user-focused applications while continuously learning emerging technologies. Quick learner with strong analytical thinking, adaptability, and a collaborative mindset. Eager to contribute technical expertise, creativity, and dedication in an entry-level software development or IT role while delivering high-quality solutions and growing within a dynamic organization.

TECHNICAL SKILLS

Languages	: Python, JavaScript, SQL, HTML5, CSS3
Databases	: MySQL, MongoDB, Oracle Database
Dev Tools	: Git, GitHub, Visual Studio Code, Jupyter Notebook, GitHub Actions
OS / Others	: Windows, Linux, Responsive Web Design, Vercel Deployment
Productivity	: MS Word, MS Excel, MS PowerPoint

EDUCATION

Master of Computer Applications (MCA) <i>Biju Pattnaik University of Technology (BPUT)</i>	Sep 2024 – Jul 2026 <i>Rourkela, Odisha, India</i>
- Pursuing MCA with focus on software development, data structures, algorithms, and emerging technologies. - Actively building projects in deep learning, full-stack web development, and AI-powered applications. - Engaging in coding challenges, collaborative teamwork, and research-oriented problem solving.	
Bachelor of Education (B.Ed.) <i>Dr. B.R. Ambedkar University</i>	Sep 2022 – Aug 2024 <i>Etcherla, Andhra Pradesh, India</i>
- Graduated with 8.3 CGPA; developed strong competencies in analytical thinking, structured communication, and instructional design. - Gained expertise in innovative teaching methodologies, curriculum planning, and interpersonal engagement.	
Bachelor of Science (B.Sc.) – Physics & Physical Science <i>Berhampur University</i>	Jul 2019 – Jul 2022 <i>Berhampur, Odisha, India</i>
- Graduated with 9.4 CGPA, securing First Position in the batch. - Built a strong foundation in analytical problem-solving, quantitative reasoning, and scientific research aptitude.	

PROJECTS

EduLearn – E-Learning Platform	<i>HTML5, CSS3, JavaScript, Git, Vercel</i>	Source Code
- Designed and deployed a fully responsive e-learning web application using HTML5, CSS3, and vanilla JavaScript, hosted on Vercel with CI/CD via GitHub Actions. - Implemented mobile-first responsive design ensuring seamless compatibility across all screen sizes and devices. - Developed interactive UI/UX components including smooth navigation, dynamic content sections, and accessible page layouts.		
Yamazone – E-Commerce Demo	<i>Python, Flask, HTML5, CSS3, JavaScript, REST API</i>	Source Code
- Built a full-stack e-commerce web application inspired by Amazon, with a Python Flask backend and HTML/CSS/JavaScript frontend. - Implemented key features: product catalog API, Add-to-Cart drawer with live subtotal, Buy Now order simulation, Quick View modal, and personalized product recommendations. - Integrated RESTful API endpoints for backend-frontend communication and deployed live on Vercel.
