PROFESSIONAL SUMMARY

Results-driven and detail-oriented **MCA candidate** with hands-on experience in **full-stack web development, machine learning, and deep learning**. Proficient in Python, JavaScript, SQL, and modern frameworks including Flask and Keras/TensorFlow. Demonstrated ability to design, develop, and deploy end-to-end software solutions and AI-powered predictive systems. Strong analytical, problem-solving, and communication skills with a proven track record of academic excellence. Eager to contribute to a dynamic team in a software engineering or data science role.

TECHNICAL SKILLS

Languages	: Python, JavaScript, SQL, HTML5, CSS3
Frameworks	: Flask, Keras, TensorFlow, scikit-learn
ML / AI	: Deep Learning, CNN, LSTM, GRU, Bidirectional RNN, Self-Attention, Feature Engineering, Time Series Forecasting, Regression, SVM, Linear Regression
Databases	: MySQL, MongoDB, Oracle Database
Dev Tools	: Git, GitHub, Visual Studio Code, Jupyter Notebook, GitHub Actions
Data Libraries	: NumPy, Pandas, Matplotlib, MinMaxScaler, MIC (minepy)
OS / Others	: Windows, Linux, REST APIs, Responsive Web Design, Vercel Deployment

EDUCATION

Master of Computer Applications (MCA) <i>Biju Pattnaik University of Technology (BPUT)</i>	Sep 2024 – Jul 2026 <i>Rourkela, Odisha, India</i>
- Pursuing MCA with focus on software development, data structures, algorithms, machine learning, and emerging technologies. - Actively building projects in deep learning, full-stack web development, and AI-powered applications. - Engaging in coding challenges, collaborative teamwork, and research-oriented problem solving.	
Bachelor of Education (B.Ed.) <i>Dr. B.R. Ambedkar University</i>	Sep 2022 – Aug 2024 <i>Etcherla, Andhra Pradesh, India</i>
- Graduated with 8.3 CGPA; developed strong competencies in analytical thinking, structured communication, and instructional design. - Gained expertise in innovative teaching methodologies, curriculum planning, and interpersonal engagement.	
Bachelor of Science (B.Sc.) – Physics & Physical Science <i>Berhampur University</i>	Jul 2019 – Jul 2022 <i>Berhampur, Odisha, India</i>
- Graduated with 9.4 CGPA, securing First Position in the batch. - Built a strong foundation in analytical problem-solving, quantitative reasoning, and scientific research aptitude.	

PROJECTS

Electricity Consumption Prediction	<i>Python, Keras, CNN, BiGRU, Flask, scikit-learn</i>	Source Code
- Developed an end-to-end time series forecasting system to predict household electricity consumption using a hybrid CNN-BiGRU-Self Attention (SA) deep learning architecture. - Implemented MIC (Maximal Information Coefficient) based feature selection to identify the top 8 most relevant features, improving model accuracy and reducing noise. - Applied MinMax normalization and engineered temporal features (year, month, day, hour, minute, second) from raw datetime fields for structured model input. - Benchmarked the proposed model against SVM and Linear Regression baselines; the CNN-BiGRU-SA model achieved superior R² Score, lower RMSE and MAE.		

- Deployed the trained model via a **Flask REST API** with an admin-authenticated web interface for real-time prediction on new test data.

EduLearn – E-Learning Platform

HTML5, CSS3, JavaScript, Git, Vercel

[Source Code](#)

- Designed and deployed a **fully responsive e-learning web application** using **HTML5, CSS3, and vanilla JavaScript**, hosted on Vercel with CI/CD via GitHub Actions.
- Implemented **mobile-first responsive design** ensuring seamless compatibility across all screen sizes and devices.
- Developed interactive UI/UX components including **smooth navigation, dynamic content sections**, and accessible page layouts.

Yamazone – E-Commerce Demo

Python, Flask, HTML5, CSS3, JavaScript, REST API

[Source Code](#)

- Built a **full-stack e-commerce web application** inspired by Amazon, with a **Python Flask** backend and **HTML/CSS/JavaScript** frontend.
- Implemented key features: **product catalog API, Add-to-Cart drawer with live subtotal, Buy Now order simulation, Quick View modal**, and personalized product recommendations.
- Integrated **RESTful API endpoints** for backend-frontend communication and deployed live on Vercel.

CERTIFICATIONS

- [HackerRank SQL \(Basic\) Certificate](#) – HackerRank
- [HackerRank SQL \(Intermediate\) Certificate](#) – HackerRank
- [HackerRank Python \(Basic\) Certificate](#) – HackerRank

CORE COMPETENCIES

- **Machine Learning & Deep Learning:** Model design, training, evaluation, hyperparameter tuning, and deployment
- **Full-Stack Development:** End-to-end web application development using Python (Flask) and JavaScript
- **Data Analysis:** Feature engineering, data preprocessing, normalization, and statistical analysis
- **Problem Solving:** Strong algorithmic thinking with active practice on LeetCode
- **Collaboration:** Effective team player with experience in agile, project-based, and cross-functional environments
- **Communication:** Clear written and verbal communication; experienced in structured documentation and reporting
